Abstract (en)

[origin: WO2019043237A1] The invention relates to a device (1) for filling a container (100) with a filling product, comprising a filling valve (2) for influencing the supply of the filling product into the container (100) to be filled, preferably during the transport of the container (100) to be filled, by a container transport device, a dosing valve (40) for dosing a dosing product from a dosing product vessel (4, 5) into the filling valve (2), and a main component vessel (3) for supplying a main component to the filling valve (2), a dosing product replacement device (6) being provided for replacing the dosing product in the dosing product vessel (4, 5) during the filling operation.
