Abstract (en)

[origin: WO2019043243A1] The invention relates to a device (1) for filling a container (100) with a hot filling product, comprising a filling valve (4) for influencing the supply of the filling product into a container (100) to be filled, a main component vessel (2) for supplying a main component to the filling valve (4), and a dosing valve (50) for dosing a dosing product from a dosing product vessel (5) into the filling valve (4), a heating device (3) being provided for heating the main component in order to supply the heated main component to the filling valve (4), the dosing product being supplied to the dosing valve (50) without heat.
