Abstract (en)

[origin: WO2019048661A1] The present invention relates to a positioning device (1) for the relative positioning of a container to be treated and a treatment member in a container treatment facility, comprising a positioning cylinder (2) and a piston (3) accommodated in the positioning cylinder (2), which piston is connected to a piston rod (4), a pressure chamber (20) being formed between the piston (3) and positioning cylinder (2), on which piston a working medium can act, and a locking mechanism (5) for locking the position of the positioning cylinder (2) relative to the piston rod (4), the locking mechanism (5) being accommodated in the piston rod (4).
