Abstract (en)
According to a one aspect there is provided a lid for closing a tobacco product storage container, the lid comprising a humidifier compartment configured to contain a humidifier, the lid having first and second opposing sides, wherein: the first side comprises a porous wall of the humidifier compartment configured to permit egress of water and/or water vapour from the humidifier compartment; and the second side comprises a closure of the humidifier compartment configured to permit access to its interior and further configured to prevent egress of water and/or water vapour from the humidifier compartment. According to another aspect there is provided a tobacco product storage container comprising such a lid. According to a further aspect there is provided a method of humidifying such a tobacco product storage container.
