Abstract (en)  
The invention relates to a vapor generating device (10) for generating a vapor from a liquid, wherein said liquid comprises nicotine or a salt thereof, a method for generating vapor and an electronic delivery system for providing nicotine to a user. Vapor generating device (10) comprises a base plate (11) supporting an electric heater (20), said electric heater (20) having an interior space arranged to receive a liquid conveying elongated wick (24), and a plurality of apertures (28) extending from interior space to an exterior surface, said apertures (28) transmitting liquid released from wick (24) to electric heater (20). The invention also relates to a method to use the vapor generating device (10) to inhale nicotine aerosol.
