Abstract (en)
[origin: US2019075853A1] The subject matter of this specification can be embodied in, among other things, a garment that includes a body having a first end and a second end opposite the first end. The body has an anterior knit region having a first knitting pattern configured to stretch across a portion of a wearer's abdominal area, a second knitting pattern configured to stretch across a portion of a wearer's chest area, a posterior knit region having the first knitting pattern configured to stretch about a portion of the wearer's back, a first lateral knit region having a third knitting pattern different from the first knitting pattern configured to stretch about a portion of the wearer's left lateral area, and a second lateral knit region having the third knitting pattern configured to stretch about a portion of the wearer's right lateral area.
