Abstract (en)
[origin: WO2019052920A1] The disclosure relates to a power tool (10) comprising a light emitting device (20) arranged to light up a screw joint on an object to be assembled. The power tool is operative to retrieve a signal indicating the position of the power tool in relation to a number of screw joints on an object to be assembled. And provide a first type of light signal from the light emitting device in case the signal indicates that the power tool is positioned in relation to the screw joint next to be tighten and a second type of light signal in case the signal indicates that the power tool is positioned in another position.
