Abstract (en)
[origin: GB2565311A] A stackable box for transporting fish, formed from a single sheet of material, comprising: side walls 4 and end walls 11 upstanding from a base; gusset panels 17-20 with diagonal fold between the end and side wall; a portion of each gusset panel being secured to the end wall so that when the end walls are pulled outwardly from the base, the side walls are lifted; where the side and end walls have an inwardly extending flap 5, 15 (respectively) at the upper end to provide a continuous ledge around the upper open face of the box. Preferably, the side wall incorporate a secondary side panel 7 folded over and adhered to the base via fixing strips (10, fig. 1). Preferably, outer flaps 16 attached to side walls fold under ledge panels. Preferably, box is formed from vertically orientated, fluted, twin wall, olefin plastic material.
