Abstract (en)
[origin: WO2019053616A1] Package (1) for articles, comprising: an article (2); an extraction opening (3) for the article (2); an inner shell (4); an outer shell (5) that comprises an opening (50) through which the inner shell (4) can slide between an opening position (A), in which the access to the article (2) is allowed through the extraction opening (3), and a closing position (B), in which the access to article (2) is prevented; and a connection element (6) that connects the outer shell (5) and the inner shell (4) comprising a support portion (60) for the article (2) on which the article (2) is arranged. The connection element (6) is foldable to assume a first configuration, when the inner shell (4) is in the closing position (B), in which the support portion (60) is at a first distance (d1) from the extraction opening (3), and a second configuration, when the inner shell (4) is in the opening position (A), in which the support portion (60) is at a second distance (d2) from the extraction opening (3) which is lesser than the first distance (d1).
