Abstract (en)
[origin: WO2019055952A1] A computing device includes a memory and a touch screen including a display medium for displaying a representation of at least one graphic object stored in the memory, the graphic object having at least one parameter stored in the memory, a surface for determining an indication of a change to at the least one parameter. In response to indicating the change, the computing device is configured to automatically change the at least one parameter in the memory and automatically change the representation of the one or more graphic objects in the memory, and the display medium is configured to display the changed representation of one or more graphic objects with the changed parameter.
