Abstract (en)

[origin: WO2019052595A1] Display device (AE) for giving a visual warning to a car driver who is turning off a main road (HS) into a side road (NS) about a person (R1) who is approaching the side road (NS) parallel to the main road (HS), with at least one sensor for sensing the person (R1) and at least one light (L1, L2) which emits a visual warning signal when a person (R1) approaches, characterized in that the emission angle of the light (L1, L2) which emits the visual warning signal is oriented so as to open into the intersection region between a first axis (X) running transversely with respect to the course of the main road (HS) and a second axis (Y) running transversely with respect to the course of the side road (NS).
