Abstract (en)
[origin: EP3683352A1] A laundry treating apparatus is provided, and comprises: a rear support (1), laundry treating drums (7, 8), and a condensation drying module. The rear ends of the laundry treating drums (7, 8) are installed on the rear support (1), and the laundry treating drums (7, 8) are in communication with the condensation drying module. The condensation drying module comprises a base (4) and a condenser (2), and the rear support (1) is provided with an opening for allowing the condenser (2) to be inserted and installed into the base (4). By forming the opening in the rear side of the laundry treating apparatus, the integral structure of a front panel of the whole apparatus is reserved, and the front panel has integrity, which is favorable for the aesthetics of the front panel, and significantly improves the aesthetics of the laundry treating apparatus. In addition, forming the opening in the rear support (1) facilitates enhancing of the structural strength of the front panel.
