Abstract (en)
[origin: WO2019043420A1] A hybrid jacket-bag is proposed. The jacket-bag hybrid is a multi-formed, multi-functioning piece of wear, in the shape of a jacket, that is used as a storing area, functioning as a backpack, as well. It can possibly have a size changing belt, to provide the relevant option. In the upper part, it can have an opening to access the storing area that covers the biggest part of the internal surface of the jacket, and can close, for example, with a zip. In the lower part, it can have a zip to hold a pleat, that, when unfolded, it can increase the storing capacity of the bag. In the side parts, it can have two side-pockets incorporated, that can close with zips. Inside these pockets, there can be two belts with slide bar buckles, respectively, and a buckle that can secure the bag onto the body. It can be worn folded, as a shoulder bag. In different variations, it can additionally have a hood or sleeves. It can be constructed from different materials, provided that they can be sewn, and in a wide variety of colors.
