Abstract (en)

[origin: WO2019057527A1] The invention relates to a drive device for a movable furniture part (3) comprising a lockable ejection device (6), by means of which the movable furniture part (3) can be ejected out of a closing position by an energy accumulator (22) in the opening direction, the ejection device (6) comprising a control element (40) that can be coupled to the movable furniture part (3) and is held by the energy accumulator (22) in a locked position of the ejection device (6) on a multiple-part locking seat. An electromechanical actuator (82) is provided for unlocking the ejection device (6), by means of which part (51) of the locking seat can be moved.
