Abstract (en)
[origin: WO2019058059A1] The invention relates to padding (1) comprising, associated consecutively with one another: a cover (2) comprising a covering format (3) intended for being heated, said cover being provided with a decorative concave marking (15); a comfort layer (9); a heating sheet (6) made up of a network of resistive conductive filaments (7) attached to the surface of a porous, electrically insulating supporting sheet (8); a cushioning block (22) made of elastically compressible polyurethane foam, said block overmoulding at least said format via said sheet and said comfort layer, said comfort layer being provided with at least one cut-out forming an opening (10) arranged so as to receive said marking, so that, opposite said marking, said sheet is not deformed or is subject to less deformation than said marking, said foam passing through said sheet in order to overmould said cover at said marking.
