Abstract (en)  
[origin: WO2019057358A1] A plastic pallet having a top panel (2) for accommodating articles, and having at least two, preferably three, runners (4) which are arranged beneath the top panel, are arranged parallel to one another, and parallel to a pallet periphery (6), and each have a runner-standing surface (12), at the ends of which is arranged a respective supporting-foot-like runner-supporting member (10), which is angled in the direction of the top panel from the runner-standing surface, wherein the runner-standing surface (12) is spaced apart from the top panel, and connected in a releasable manner thereto, by the runner-supporting members (10) and supporting feet (8) arranged therebetween, wherein the runners (4) are each formed from at least two, preferably in each case single-piece, runner elements (4a, 4b), which can each be connected in a releasable manner to the top panel (2) and, in the position in which they have been mounted on the top panel, together form a runner (4) of the pallet.
