Abstract (en)  
[origin: WO2019057827A1] The present invention relates to a reusable offshore installation template for the installation of offshore wind turbine foundations, in particular monopiles. The template comprises a sleeve 100 adapted to receive the monopile and guide it in the sleeve direction through the sleeve, and a support assembly (300) comprising a base (310) defining a landing surface and a support frame (320) extending from the base. The installation template is adapted to reorient the sleeve direction S relative to the landing plane of the base based on a force applied to the sleeve.
