Abstract (en)

[origin: WO2019053344A1] The invention relates to a closure assembly for a double door comprising an opening leaf (1) and a fixed leaf (2), said assembly comprising electromagnetic locking closure means and mechanical locking means. The electromagnetic locking closure means lock the opening leaf in the closed position on the fixed leaf, by means of magnetic attraction between magnetic door strikes (12) and cooperating counter plates (22). The mechanical locking means can be used beforehand to lock the opening leaf in the fixed position on the door frame (3) under the control of a cremone bolt mechanism (5) that does not include side bolts. The magnetic door strikes and the counter plates are housed, respectively, in a strip profile (11) mounted on the fixed leaf and in a handle profile (21) mounted on the opening leaf.
