Abstract (en)

[origin: WO2019057401A1] The invention relates to an adjusting device (1) having at least one tappet assembly (3, 6). The at least one tappet assembly (3, 6) comprises a tappet (31, 61), at least one guide cylinder (34, 64), and a pole core (44, 74). The tappet (31, 61) is arranged in the guide cylinder (34, 64) in a movable manner along a longitudinal axis (30, 60), and a non-magnetic connection socket (43, 73) is arranged between the guide cylinder (34, 64) and the pole core (44, 74). The guide cylinder (34, 64) and the pole core (44, 74) are arranged at a distance to each other in the longitudinal axis (30, 60) by means of the connection socket (43, 73).
