Abstract (en)

[origin: WO2019057767A1] Abstract The invention relates to a modular connection block (2, 2') with a plurality of electrical connection modules (4) for conductor connection to an electronic component (66), wherein the connection modules (4) each have a 5 connection housing (10) which are held together in a grouping (14) by holding means (12). The holding means (12) have at least one strip-like connecting element (16, 18, 56, 58), by means of which the connection housings (10) are connected, wherein the connection housings (10) are arranged next to one another along the strip-like connecting element (16, 18, 56, 58) in a 10 row arrangement (20, 20', 20'').
