Abstract (en)

[origin: US2019177927A1] The disclosure relates to a road finisher with an undercarriage with two traction tracks. The road finisher further comprises a chassis, a hopper, mounted on the chassis at the front of the road finisher with respect to a paving direction, for receiving paving material, and a paving screed, provided on the rear of the road finisher with respect to the paving direction, for compacting the paving material. This paving screed is attached to the chassis through pulling arms. The road finisher also comprises a lifting device which is designed to lift the chassis relative to the undercarriage at least in a rear region of the road finisher. The road finisher further comprises a material deflector, which can be pivoted relative to the chassis, and that is arranged between the two traction tracks.
