Abstract (en)  
The invention relates to a lined drain channel (4), which drain channel comprises:- a collecting tray with a bottom (5) and upright walls (6), wherein the upper edges (7) of the upright walls (6) define an inflow opening (8) and wherein the collecting tray has an outlet opening (9);- at least one discharge channel (10, 11, 12) with an elongate bottom surface and upright walls arranged in longitudinal direction and on either side of the elongate bottom surface, wherein at a first end side of the discharge channel the elongate bottom surface is arranged on an upper edge of the collecting tray and wherein the second end side of the discharge channel forms an open side of the discharge channel;- at least one plate-like lining element (15), arranged on the elongate bottom surface of the discharge channel.
