Abstract (en)
The device MAGNETICO LAMPHOLDER is a lampholder with side output electric cable. Its distinguishing feature is a magnet below the lamp which allows to attach it to any iron surface by simply leaning it, without any further joint and/or reinforcement. The presence of the magnet below the device gives the lampholder a great flexibility because it allows to attach and detach it to any iron surface as many times as you want. The device MAGNETICO LAMPHOLDER can also have many accessories and can be used in several ways.
