Abstract (en)  
[origin: WO2019064186A1] A sleeve for connecting together an outer tube and an inner tube of an electric household appliance is described, the sleeve comprising: a main body, an actuating button and a cover-piece; a seat for the actuating button and a latch for the cover-piece on the side wall of the main body, wherein the actuating button comprises: a pressing zone on which a user may exert an unlocking pressure, a tooth configured to penetrate into a cavity of the inner tube, passing through a window in the sleeve, a pivot arranged between said pressing zone and said tooth, and an elastic member configured to push elastically said actuating button with respect to said cover-piece, wherein an unlocking pressure on said pressing zone has the effect of causing the tooth to come out of the cavity of the inner tube.
