Abstract (en)

[origin: WO2019063699A1] The invention relates to a method for generating a current operating strategy proposal (29) for a motor vehicle (1), using which a user (2) of the motor vehicle (1) is advised how the motor vehicle (1) can be operated with respect to at least one resource (23, 25, 26, 28) available to the motor vehicle (1), the method comprising the following steps: a) detecting an individual feature (11) of the user (2) of the motor vehicle (1); b) selecting user-specific operating information (14) which, using the individual feature (11), describes how the user (2) usually operates a motor vehicle; c) determining a current operating requirement (17) of the user (2) of the motor vehicle (1) using the operating information (14); d) determining the at least one resource (23, 25, 26, 28) currently available to the motor vehicle (1); e) comparing the operating requirement (17) with the at least one resource (23, 25, 26, 28); and f) generating the current operating strategy proposal (29) using the comparison.
