Abstract (en)

[origin: WO2019063326A1] The invention relates to a security glazing system comprising a first (10a) and a second (10b) security glass pane, which can be interconnected around the corner, and at least one corner reinforcing profile (17), the security glass panes (10a, 10b) each comprising an outer pane (11a, 11b) and an inner pane (12a, 12b) as well as a corner recess (15a, 15b) that extends along an edge, the corner reinforcing profile (17) being receiveable in a space defined by the corner recesses (15a, 15b), for reinforcing the corners.
