Abstract (en)

[origin: EP3689179A1] The present invention provides a hair treatment method for curling a lock of hair (H) using a hair holder (1). The hair holder (1) includes a tubular body (2) into which a lock of hair (H) can be inserted from an opening (21) at a first end of the tubular body toward an opening (22) at a second end thereof, and the tubular body (2) is configured to be capable of being rolled up. The hair treatment method includes inserting a lock of hair into the hair holder, rolling up the tubular body (2) together with the lock of hair (H) inserted in the tubular body (2) so that a large diameter portion (31) that has a tubular shape and forms an outer circumferential portion and a small diameter portion (33) that is located inside the large diameter portion (31) and has a space between the small diameter portion and the large diameter portion (31) are formed, and performing curling while maintaining this wound state.
