Abstract (en)
[origin: EP3689768A1] An assembly (1) is disclosed that is suitable for forming a ballot box, comprising at least one transparent or semitransparent panel (4) inserted between at least one first side wall (5) of a first box body and at least one second side wall (7) of a second box body contained in the first box body, the two box bodies being made from two blanks with folding lines, the panel being arranged for closing a window giving access to an inner space of the assembly, leaving the possibility of viewing the interior of the assembly from the exterior, the window being defined by two openings at least partially facing one another, a first opening (8) obtained on the first side wall and a second opening (9) obtained on the second side wall.
