Abstract (en)

[origin: WO2019068637A1] The invention relates to a wireless charging device (2) for a battery pack (110) of an electronic module (10) mounted in a shoe (1), the electronic module (10) comprising a receiver coil (120) capable of receiving a charge signal for charging the battery pack (110). The device (2) comprises a body which is suitable for being placed in an inner compartment in the shoe (1), and a wireless charging module mounted in the body and comprising at least one charging coil mounted in the body of the device (2) so as to permit the wireless charging of the battery pack (110) when the device is placed in the inner compartment in the shoe (1).
