Abstract (en)

[origin: WO2019068407A1] The invention relates to a parking vehicle (1) for conveying and parking a vehicle on a roadway (F), which parking vehicle has a base (2) and two arms (6). The two arms (6) extend away from the base (2) in a direction transverse to the base (2). Each arm (6) has at least one wheel (7), which is rotatably mounted on said arm (6). A first of the two arms (6) is connected to the base (2) by means of a first guide (9). A second of the two arms (6) is connected to the base (2) by means of a second guide (9). Each arm has a holding system (11) for holding the wheels of the vehicle. Each of the two arms (6) has a lifting apparatus (10) by means of which the vehicle can be lifted away from the roadway (F), wherein each lifting apparatus (10) is operatively connected to the at least one wheel (7) of its corresponding arm (6) and guides said wheel.
