Abstract (en)
[origin: WO2019069334A1] A composite sliding wall is described, comprising at least one horizontal frame (1) sliding along horizontal guides (10), a oblique frame (2) sliding along slanting guides (20), and motion transmission means (12) to allow mutually moving the oblique frame (2) and the horizontal frame (1), the motion transmission means (12) being arranged along a vertical direction to allow the oblique frame (2) to vertically move with respect to the horizontal frame (1), the motion transmission means (12) being composed of a grooved guide (1201) interacting with a sliding element (1202) equipped with idle pulleys.
