Abstract (en)

There is described a drinking straw (3, 3' , 3", 3''') for a package (2) being filled with a pourable food product comprising a tubular main portion (16) configured to be inserted, in use, into the package (2) and an incision (19) dividing the tubular main portion into a first section (20) and a second section (21) being connected to one another. The second section (20) is configured to abut against an inner surface of the package (2) for limiting, in use, a movement of the tubular main portion (16) out of the package (2) for impeding the removal and/or separation of the drinking straw (3, 3' , 3", 3''') from the package (2).
