Abstract (en)

The invention refers to a mobile workstation (2) comprising a mobile vacuum dust suction device (4) and a storage unit (6) attached to the mobile vacuum dust suction device (4) and adapted for storing hand-held power tools (20), accessories for the power tools (20), consumables (55) for the power tools (20) and/or other objects. It is suggested that a top section (30) of a housing of the mobile vacuum dust suction device (4) comprises at least one movable part (32), which is adapted to be moved between a closed position and an opened position, wherein the at least one movable part (32) forms a receiving compartment (33) adapted for receiving the hand-held power tools (20), the accessories for the power tools (20), the consumables (55) for the power tools (20) and/or the other objects when in its opened position.
