Abstract (en)

There is described herein a housing for a light emitting source comprising a body (51) formed of one or more walls, wherein the one or more walls surround a volume, and wherein the body has a proximal end (59) and a distal end, wherein the distal end is open. Moreover at least one arm (53) is attached to the body (51), wherein the arm (53) is configured to secure the housing to a surface, and wherein the body (51) and the at least one arm (53) are formed of unitary construction. There is also described a method of manufacture, and of installation.
