Abstract (en)
[origin: EP3544268A1] The present disclosure provides an electronic device and a manufacturing method thereof. The electronic device includes: a display screen, the display screen including a display area and a non-display area surrounding the display area; a light sensor arranged below the display area; and a light guiding element arranged below the display screen, the light guiding element being configured to transmit light penetrating the non-display area to the light sensor.
