Abstract (en)
[origin: WO2019074458A2] The present invention is a hot beverage preparation device (10) comprising a main body (100), a cooking chamber (200) in order to be placed to a chamber housing (160) provided on said main body (100), and a control unit (110) configured to generate command signal for providing applying of the cooking steps according to the signal generated by at least one sensor (220) accommodated by said cooking chamber (200). Accordingly, said cooking chamber (200) comprises a transmitter (210) connected to the sensor (220), said transmitter (210) is arranged to emit electromagnetic or mechanic wave in a manner representing the signal received from the sensor (220), said main body (100) comprises a receiver (120) arranged to receive electromagnetic or mechanic wave and to provide the signals, represented by the electromagnetic or mechanic waves received, as input to the control unit (110).
