Abstract (en)

[origin: WO2019072865A1] The invention relates to a fibula bone material removal and transfer template (1) having a main part (4) designed to be applied to a bone region (3), wherein at least one bone separating tool guiding section (8) can be detachably attached or is attached to the main part (4), and wherein a receiving pocket (10 a, 10b, 11a, 11b) configured to receive an implant (9) is formed in the main part (4). The invention also relates to a kit composed of the fibula bone material removal and transfer template (1) and an implant (9).
