Abstract (en)

[origin: WO2019072414A1] The invention relates to a display device for seats of a rail vehicle car, wherein the display device comprises a plurality of displays, which, in an interior of the rail vehicle car and externally on the rail vehicle car, each display at least one seat property. In order to create a display device by means of which a passenger of a rail vehicle car can identify where a seat reserved for this passenger is located even before embarking, the display device being easily installable, at least one display is arranged within at least one window frame of the rail vehicle car.
