Abstract (en)

[origin: WO2019072563A1] The invention relates to a laundry-care appliance (100) comprising a liquid-collecting container (119) for collecting washing liquid, the liquid-collecting container (119) having an opening (121) that connects an inner region (123) of the liquid-collecting container (119) to an outer region (125) of the liquid-collecting container (119). The laundry-care appliance (100) comprises a closing device (129) which is arranged in the inner region (123) of the liquid collection container (119), on the opening (121), said closing device (129) comprising a plurality of movably mounted closing elements (127), said movably mounted closing elements (127) being designed in such a way as to close the opening (121) in a fluid-tight manner in a closing position and to release the opening (121) in a release position.
