Abstract (en)  
[origin: WO2019072506A1] The invention relates to a connector (1) for two fluid systems which are separated from one another in a liquid-tight manner, comprising a housing (2) which has a first end (3) and a second end (4), a first channel (5) for a first fluid being formed between the first end (3) and the second end (4), and a second channel (6) for a second fluid being arranged at least partially inside the first channel (5), the second channel (6) passing coaxially through the second end (4). According to the invention, in the region of the first channel (5), the housing (2) has an outlet portion (7) having an outlet opening (8) through which the second channel (6) exits from the first channel (5).
