Abstract (en)
A fence post (1) for attaching a fence panel (3) consists of two detachably connectable open sections (11, 12), where the sections (11, 12) have on each free end of the flanges at least one bend (13) towards the inside of the section (11, 12), these sections (11, 12) being detachably connectable to each other by connecting means (2) engaged through the bends (13), whereas mounting openings (14) for the connecting means (2) are provided in the web of the section (11, 12), along the length of the section (11, 12). The fence panel (3) comprises at least one area (31) on its edge, for inserting between the bends (13) of the sections (11, 12) of the fence post (1).
