Abstract (en)

[origin: WO2017100955A2] The invention relates to an air humidifier device (10) comprising a hydrophobic microporous membrane (1) as a separator between the water and the air to be humidified, wherein the volumetric flow of water over time is set to be greater by factor X than the volumetric flow of steam. This allows air to be humidified with water at a low temperature, without disruption.

Abstract (de)

Membranelement bestehend aus flächig angeordnetem Membranmaterial auf einem Spannrahmen, wobei der Spannrahmen aus spritzgießbarem Kunststoff besteht und wobei das Membranmaterial bevorzugt hydrophob und mikroporös ist. Verfahren zum Herstellen eines Membranelements.
