Abstract (en)
The invention relates to an automatic vending machine (1) of a plurality of items (P), comprising: a plurality of storages (50) for housing the items (P), an automated dispensing apparatus (110), which is configured to move the items (P) with respect to the storages (50), a measuring apparatus (205,210) housed inside the vending machine and configured to detect the value of a parameter indicating the number of items (P) present inside a storage (50), and an electronic control and command unit (200), which is operatively connected to the measuring apparatus (205,210) and is configured to calculate the number of items (P) present in the storage (50), based on the value indicating the number of product detected by the measuring apparatus (205,210).
