Abstract (en)

[origin: US2019116932A1] In one aspect, the present disclosure relates to an article of footwear. The article of footwear may include an inner element, the inner element having an overfoot portion and an underfoot portion. The article of footwear may further include an outer element at least partially formed by a first knitted component, the outer element covering the throat area of the inner element. The article of footwear may further include a fastening element secured to the inner element in a throat area, where the fastening element is located between the inner element and the outer element, and where adjustment of the fastening element adjusts the fit of the inner element when the article of footwear is in use. The article of footwear may further include a sole structure, where the sole structure at least partially covers the underfoot portion of the inner element.
