Abstract (en)

[origin: WO2019076518A1] The present invention relates to a device comprising an elastic receptacle (B) which contains at least one three-dimensional geometric body (K) and optionally at least one liquid (F), the at least one three-dimensional geometric body (K) having a shore hardness A in the range of -5 to 20. The present invention further relates to the use of the device according to the invention for stimulating the female clitoris. It finally relates to a slip to the interior of which the device according to the invention is secured.
