Abstract (en)

[origin: WO2019076950A1] The present invention relates to a drive device for driving a device (100) for notching, wherein the device (100) for notching comprises a frame having a stand (104) and a head piece (106) connected to the stand (104), a tappet (114) that is coupled to the head piece (106) and can be moved along a punching axis (116) extending along a y-axis, and optionally a partial apparatus (120) for receiving a workpiece (102) to be machined. The drive device comprises an electric direct drive (118) for driving the tappet (114).
