Abstract (en)

[origin: WO2019077029A1] The invention relates to a method for removing ice and/or snow from a bogie of a rail vehicle. According to the invention, at least one cleaning jet (16) containing solid particles is directed at the bogie, if required or at time intervals, in such a way that ice and/or snow is removed from surfaces of at least some assemblies of the bogie and transported away. The bogie is installed on the rail vehicle while the at least one cleaning jet (16) containing solid particles acts on the surfaces of the bogie.
