Abstract (en)

[origin: WO2019077066A1] The invention relates to a method for loading a stowage space with transport goods in a fully automated manner, in particular for loading a stowage space of a truck with cuboidal transport goods in a fully automated manner. The invention is characterized in that a transport device with a flat support surface is provided, wherein the transport goods to be loaded are loaded onto the flat surface, and the outer contour of the entirety of the loaded transport goods corresponds to the inner contour of the stowage space as much as possible.
