Abstract (en)

[origin: WO2019076429A1] The present invention relates to a nozzle (100) for treating a yarn, comprising at least a first yarn channel (1) and at least a second yarn channel (2). The first yarn channel (1) has a first cross-section and the second yarn channel (2) has a second cross-section. The first and the second cross-section have in each case a different size and/or a different shape.
