Abstract (en)

[origin: WO2019106049A1] The invention concerns a receiver/drier (6) adapted to have pass through it a refrigerant fluid (FR) of a refrigerant fluid (FR) circuit (1) for a vehicle, in particular a motor vehicle. The receiver/drier (6) comprises a closed housing (10) provided with a fluid inlet (14) for admission of the refrigerant fluid (FR) to the interior of the housing (10) and with a fluid outlet (15) for evacuation of the refrigerant fluid (FR) from the housing (10). The housing (10) accommodates at least one desiccant (16) and at least one particle filter (17a, 17b, 17c). The receiver/drier (6) is provided with a phase separation device (18) between a liquid phase and a gas phase of the refrigerant fluid (FR) admitted to the interior of the housing (10).
